EDUCATION

Southern Connecticut State University

Bachelor of Science in Computer Science

New Haven, CT

Graduated May 2025

- **Relevant Coursework:** Algorithms and Data Structures, Object-Oriented Programming, Database Applications and Design, Artificial Intelligence, Web Development
- **Certifications:** AWS Certified Solutions Architect - Associate (2026)

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, TypeScript, HTML/CSS

Frameworks: React, Next.js, Node.js, PostgreSQL, Gherkin, JUnit

Tools: Git, GitHub, GitHub Actions (CI/CD), AWS, Claude Code, MCPs

WORK EXPERIENCE

Victory Waves | Software Engineering Intern | *New Haven, CT*

September 2024 - December 2024

- * Developed a phonebanking app using React Native, Expo, and Twilio, adopted by candidates for the Connecticut General Assembly, NYC Council, and U.S. Congress to enhance campaign outreach.
- * Improved call management speed by 20% by implementing automated call bridging, facilitating seamless connections between phonebankers and contacts via Twilio's API.
- * Streamlined dial session management, allowing phonebankers to easily navigate contacts and manage call notes, supporting over 100 political calls daily.

UKG | Software Engineering Intern | *Lowell, MA*

May 2024 - August 2024

- * Expanded automated test coverage using RESTful APIs to include new international payroll features, ensuring comprehensive and reliable validation.
- * Actively participated in Agile development processes, including sprint planning, daily stand-ups, and sprint reviews to ensure timely and efficient project progression
- * Upgraded an older JSP-style web page to a modern React-based UI using RESTful APIs, resulting in improved performance and user experience.
- * Performed functional testing of the front-end using Selenium and Gherkin, creating clear and effective test scenarios to validate user interactions and application behavior.

PROJECTS

FluentDiary | Tauri, Rust, React, TypeScript, Whisper.cpp | fluentdiary.com

- * Built desktop language learning app with Tauri (Rust + React/TypeScript) and local Whisper.cpp, enabling 100% offline speech transcription across 5 languages.
- * Developed real-time audio processing pipeline in Rust with automatic format conversion and resampling for cross-platform microphone compatibility.

OMVEE | Next.js, FastAPI, PostgreSQL, Whisper, DeepSeek, Docker

- * Created AI video generation SaaS for independent artists and content creators to produce music videos and short-form content without production budgets.
- * Developed multi-step AI agent with function calling and state management, autonomously orchestrating transcription, scene selection, image/video generation without human intervention via OpenAI API and background job queue.

Debatably.io | WebRTC, Whisper, GPT-4o, Supabase, Docker, GCP Cloud Run | debatably.io

- * Worked in a team of four to build a live 1-on-1 video debate platform with real-time transcription and AI-powered judging using WebRTC, Whisper, and GPT-4o.
- * Engineered scalable backend services with Supabase, Docker, and Cloud Run, and implemented a custom Socket.IO signaling server for peer-to-peer video and audio.
